Insufficient details have been provided regarding the number and location of all 40 carparks. Additionally it is quite likely that chipsealing of the formed carpark and manoeuvring areas will be required in order to correctly identify, allocate and control parking.

Additional carparking in this area and increased event size will mean a traffic impact assessment needs to be carried out on the Greymouth-Kumara Tram and potentially also the State Highway intersection. It is recommended that Waka Kotahi be involved as there are potential impacts on the State Highway intersection.
