May it please the Commissioner

1. At the reconvened hearing the Commissioner said that he would issue a Minute and set out questions to which he required responses from the Applicant's witnesses.

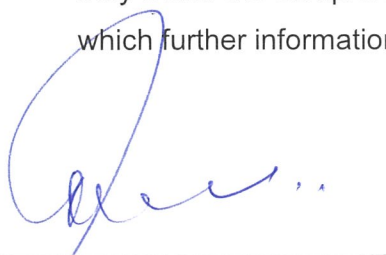

2. The Minute records: -

"There were also some questions the applicant's witnesses needed to research the answers to and it was agreed that they could provide a response to those questions in writing".

However, the Minute does not record the questions, but requires witnesses to: -

"... provide a comprehensive response in writing".

3. Counsel requests that the Commissioner set out the specific questions so that witnesses may make the comprehensive response required, so as to ensure that the matters on which further information is required by the Commissioner is not misunderstood.
